## TECHNOLOGY ASSESSMENT

### Introduction:

This document represents a report on the existing voice and data infrastructure at Pollard Middle School in Needham, Massachusetts. Information in this report was derived from a thorough review of the facilities and meeting with IT Staff.

### Recommendations:

- Upgrade Auditorium audio visual system to accommodate town meetings and other functions
- Add data to the Auditorium
- Additional wireless access points needed in the Auditorium, Lecture Hall, Cafeteria and Gymnasium
- Add boxes and conduit pathways for video distribution of events to the CATV company – conduits to the exterior.
- Add projection system to the Lecture Hall
- Revisions to Soundfield systems in classrooms – not functioning well
- Provide interactive markerboards and audio visual systems in the modular classrooms
- Technology upgrades to Science Labs within the context of any renovation work.
- Provide environmental treatment in technology closets.
